

MSc in Psychology

Program Overview

The Online MSc in Psychology at the City University of Paris offers a comprehensive curriculum covering various aspects of psychology, including psychoanalysis, mental health, cognitive and biological psychology, social and cultural influences, and developmental psychology. The program is designed to be flexible and accessible, allowing students to balance their studies with professional and personal commitments.

Program Duration and Structure

- **Duration:** 9-18 Months
- **Credits:** 30 Credits
- **Delivery Mode:** Online
- **Language:** English

The program is structured to provide flexibility for working professionals, enabling them to balance their studies with their careers.

Key Features

- **Flexible Online Learning:** Access coursework and resources anytime, anywhere.
- **Comprehensive Curriculum:** Broad range of courses covering essential areas of psychology.
- **Professional Development:** Focus on career planning and personal growth.
- **Expert Faculty:** Learn from experienced and knowledgeable instructors.

Core Courses

1. **Psychoanalysis and Mental Health:** Explore the principles of psychoanalysis and its application to mental health. This course examines key theories, therapeutic techniques, and the role of psychoanalysis in contemporary psychology.
2. **Exploring Psychology:** A foundational course that introduces the major concepts, theories, and research methods in psychology. Students will gain a broad understanding of psychological science and its applications.
3. **Cognitive and Biological Psychology:** Delve into the cognitive processes and biological mechanisms that underpin human behavior. Topics include perception, memory, learning, and the physiological basis of psychological functions.
4. **Qualitative Research Methodology:** Learn the principles and practices of qualitative research in psychology. This course covers various qualitative methods, data collection techniques, and analysis strategies.

- 5. Social and Cultural Psychology and Psychology of Human Development:** Examine the impact of social and cultural factors on human behavior and development. This course explores themes such as socialization, identity, and cultural influences across the lifespan.
- 6. Rehabilitation Psychology:** Focus on the psychological aspects of rehabilitation and recovery. Topics include assessment, intervention strategies, and support for individuals with disabilities or chronic health conditions.

Personal and Professional Development

- 1. Managing Own Performance:** Develop skills for self-management and personal effectiveness. This course covers goal setting, time management, and strategies for enhancing productivity and performance.
- 2. Personal and Professional Development:** A course dedicated to fostering personal growth and professional skills. Students will engage in activities and reflections aimed at enhancing their self-awareness, communication skills, and professional identity.
- 3. Career Planning and Development:** Prepare for a successful career in psychology or related fields. This course provides guidance on career planning, job search strategies, and professional networking.

Learning Outcomes

Upon completion of the program, graduates will be able to:

- **Apply Psychological Theories:** Demonstrate an in-depth understanding of psychological theories and their applications to real-world scenarios.
- **Conduct Research:** Utilize qualitative and quantitative research methodologies to design, conduct, and analyze psychological research.
- **Understand Cognitive and Biological Processes:** Analyze cognitive and biological mechanisms underlying human behavior.
- **Evaluate Social and Cultural Influences:** Assess the impact of social and cultural factors on individual and group behavior.
- **Develop Rehabilitation Strategies:** Create and implement effective rehabilitation programs for individuals with psychological and physical disabilities.
- **Enhance Personal and Professional Skills:** Manage personal performance and engage in continuous personal and professional development.
- **Plan and Develop Careers:** Formulate effective career plans and utilize strategies for professional advancement in psychology and related fields.
- **Promote Mental Health:** Apply psychoanalytic principles and mental health knowledge to promote psychological well-being.
